COLLEGE SPORT INFORMATION SYSYEM

ABSTRACT

The college sports information system objective is to provide which manages the activity of many sport at a time. It also manages the selection activity of students to college and to state level. The users will consume less amount of time when compared to manual paper work through the automated system. The system will take care of all the servicing activity in a quick manner. Data storing is easier. It will be able to check any report at any time. The system was developed using VB6.0 method.

A database was created for all the sport inventoried and then two applications were created. The first one was application with interactive legend for Desktop-based Sport information system that was created for general public using Offline. Attributes of each sport are given to the user via pop-up window in this application.
